## Leading Builders and Building Supply Houses of Phoenix

### Episcopal Diocese Soon To Have Handsome Cathedral Group

Proposed Cathedral, Bishop's House and Parish House

With the inauguration of a genuine campaign for funds and the decision of the vestry to engage in construction at the earliest possible moment, it is now practically assured that Phoenix is soon to have a handsome Episcopal cathedral, parish house and bishop's house, representing an outlay of not less than \$100,000 and with the gifts of plans, altars, memorial windows and other accessories a total valuation of nearly \$150,000. The vestry at a recent meeting authorized the sale of the Second and Central Avenues properties which should net not less than \$50,000, leaving a like amount to be raised by subscription and otherwise. That this amount will be quickly secured is not doubted. Herewith is presented a sketch of the proposed cathedral group from

street frontage is 200 feet with a depth of 184 feet.

Features of the interior will be the magnificent altar, reredos and paintings, the gift of Frederick C. Bartlett of Chicago, one of America's foremost artists. There will be not less than three panels, producing an effect quite in keeping with the grandeur of the structure proper. To the untiring efforts of Bishop Atwood and Dean Scarlett is due in no small measure the progress that has been made toward securing the erection of this magnificent group of church buildings.

### O'DONNELL IS PLEASED WITH OUR ROAD SYSTEM

Supervisor of Irrigation in Speech Before Chamber of Commerce Describes This Valley

The following about the visit of Supervisor of Irrigation I. D. O'Donnell is from a Billings paper of recent date, and is here printed because interest remains lively in the Montanan who came here two months ago to talk over the project limit business with the farmers.

"Those who attended the Chamber of Commerce luncheon in the Northern hotel yesterday were treated to a talk which had in it the elements of an entertaining travelogue. I. D. O'Donnell, national supervisor of irrigation, occupied the speaking time with a description of a recent trip through the southern reclamation projects of the United States. In the main Mr. O'Donnell spoke seriously, comparing the features of the north and south from a farming standpoint, but there were enlivening touches of humor, when he recounted incidents of the trip which impressed themselves on his memory. "The poor man of the northern states has a better opportunity to improve his condition than those of many sections of the south. Mr. O'Donnell said, but the north also possesses disadvantages which even the score, Chinese and Mexicans have a monopoly on labor, he said, working for such small wages that a white man is prevented from securing work which will allow him to save money.

Mr. O'Donnell described each step of his trip from Billings to Salt Lake, from Salt Lake to Colorado, from Colorado to California, thence to Arizona, New Mexico, old Mexico and Texas. He declared the frost problem is far more serious in California than in Montana, thousands of smudge pots being stacked in the orchards during the winter months in preparation for the white blight.

"He spoke in complimentary terms of the boulevard system of Arizona, declaring the entire state to be far ahead of Montana in that particular. He said boulevards lined the canals of the big projects surrounding Phoenix and that there were stretches of road 60 miles in length as smooth as a floor.

"The settlers grow sugar cane extensively and are having some success with long fibered cotton," Mr. O'Donnell said. "The lateral system of irrigation is used. The southern farmers give much attention to the preparation of land for irrigation purposes, spending \$50 an acre in preparing alfalfa land.

"When you near Albuquerque you enter the curio shop and tourist zone. Many of the towns of that section are just as they were when Columbus landed—just as picturesque and just as interesting."

### FINANCE AND MARKETS

NEW YORK, April 27.—A sudden shift of the Mexican situation caused a complete reversal in the stock market. The proposal for mediation and Huerta's reported acceptance came at a time when the market had been sold out, and was in an exceptionally strong position technically. The shorts were stampeded, and for a half hour after the opening the trading was excited. The first prices were 1 to 4 points higher. The movement of Mexican petroleum was spectacular. This stock lost eleven points last week, owing to fears of damage to its property located in Mexico. It opened 10 points higher today and then bounded up to 68, an advance of 15 1/2. No such performance has been witnessed on the stock exchange since the historic flare of Rock Island several years ago. At the close, however, the stock lost all its fifteen points gain, and a point more. Smelting, which also has large interests in Mexico, made an exceptional opening gain of four points.

London played a large part in the day's movement. American stocks there moved up strongly before the opening here.

Bonds were irregular. Total sales represented a par value of \$1,675,000. United States bonds were unchanged on call.
